

RESEARCH GRANTS

The Trustees of Newlife Foundation are pleased to invite UK based research applications.

Applications should be relevant to the aetiology, prevention and treatment of Birth Defects. Whilst the Foundation wishes to encourage a broad range of research, applications into areas such as fetal loss and late onset genetic disorders will only be funded in exceptional circumstances. Newlife currently fund two types of grant. These are:

Full Grants

Full Grants are to fund 1-2 year Research Projects and should not exceed £120,000 in total. The awards will be subject to peer review by the Medical and Scientific Panel of the Foundation. **The closing date for full grant applications is Friday 7th October 2011**

Start Up Grants

Start Up grants should not exceed £15,000. These are specifically to allow researchers to undertake short projects either as complete projects or as a preliminary activity to develop full projects. These grants are not available to complete existing projects. **Applications for Start Up grants are welcome anytime before Friday February 24th 2012**

Application forms are available from:

- **Our Website at www.newlifecharity.co.uk/research**
- **Email at smorgan@newlifecharity.co.uk**
- **Telephone 01543 468 888**

All Clinical/research relevant enquiries will be referred to Newlife Foundations Medical Director Professor Michael Patton
